Name: _____

Thank You Wreath

Color the leaves, acorns and big letters. Cut around the circle and give it to someone you want to thank!

💡 **For grown-ups: why it works.** Coloring inside a shape is real hand training: small, controlled strokes strengthen the same finger muscles used for holding a pencil. Making a gift gives the coloring a purpose and starts a talk about thankfulness. The big letters are the same simple shapes your child writes, so they can trace inside them with a finger first.
