Name: _____

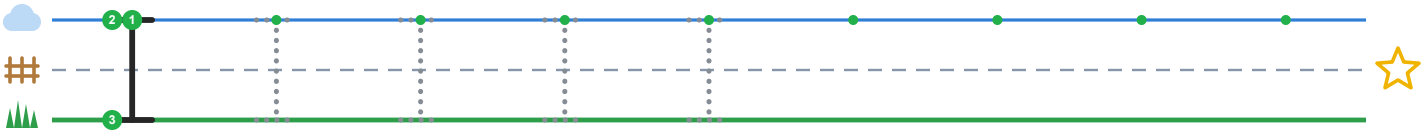

📏 Stick Letters: L I T H F E

These capitals are made only of straight lines, like sticks! Say the words as you write. Every big line starts at the top.

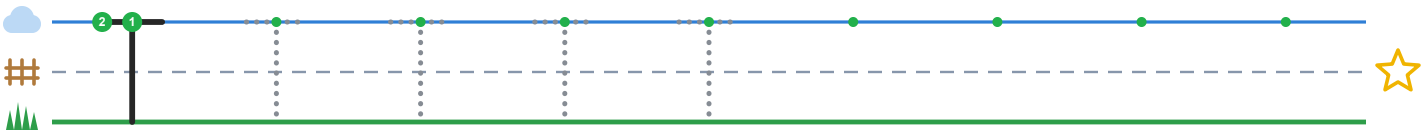

L: Big line down from the Sky to the Grass. Then slide across the Grass.

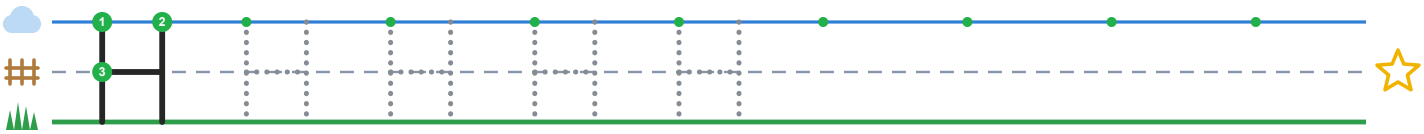

I: Big line down. Then a little line across the top and one across the bottom.

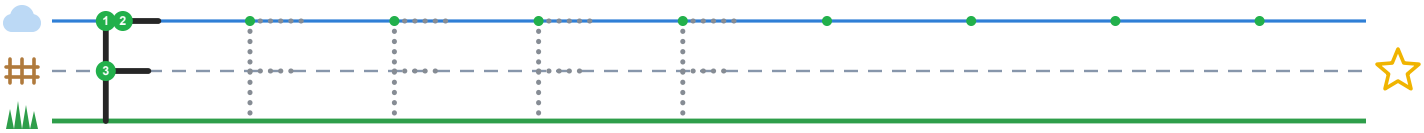

T: Big line down. Then a line across the Sky.

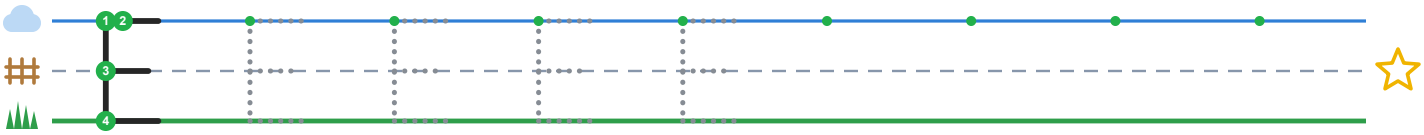

H: Big line down. Another big line down. Then cross at the Fence.

F: Big line down. Across the Sky. Then a shorter line across the Fence.

E: Big line down. Across the Sky, across the Fence, across the Grass.

💡 **For grown-ups: why it works.** Capitals made of straight lines are the easiest letters to form, so we start with them. Grouping letters by how they are made (not by ABC order) lets each one practice the last. Saying the stroke words out loud helps the hand remember.
