Name: _____

Bunny Hops on the Number Line

Put your finger on the bunny's number. Draw one hop for each jump (forward goes right, back goes left). Where does the bunny land?

1. Start at 2. Hop 3 forward. (Trace the hops.)

I land on ☐

2. Start at 4. Hop 2 forward.

I land on ☐

3. Start at 1. Hop 4 forward.

I land on ☐

4. Start at 7. Hop 2 back.

I land on ☐

5. Start at 9. Hop 3 back.

I land on ☐

💡 **For grown-ups: why it works.** The number line turns adding and taking away into movement: forward is more, back is less. It teaches counting on from a number instead of starting again at 1, a key step toward fast mental math.
