Name: _____

🤖 Color the Shape Robot

Color every shape using the key. Then count each kind of shape and write how many.

○ circle — red	□ square — blue	▭ rectangle — green	△ triangle — yellow

How many of each shape did you find?

○ ____	□ ____	▭ ____	△ ____

💡 **For grown-ups: why it works.** Finding shapes inside a bigger picture (not just alone on a page) builds real shape knowledge. Squares and rectangles side by side make children notice that a square has 4 equal sides. Answers: 7 circles, 3 squares, 8 rectangles, 3 triangles.
